

# CDR<sup>®</sup> Vehicle List

## CDR Software v8.1

Important Information about Vehicle Coverage

The Bosch Crash Data Retrieval Software and Hardware products support the retrieval of crash data from Airbag Control Modules (ACM), Roll-over Sensors (ROS) and Powertrain Control Modules (PCM) installed in vehicles listed in this document as indicated by the markings in the column labeled “Module”.

Many vehicles listed in this document include references to manufacturer specific notes which may indicate limitations in CDR product coverage. Make sure that you read the reference notes prior to determining if a vehicle is supported.

Bosch takes all reasonable actions to ensure the CDR product supports all vehicles (US and Canada) listed in this and other CDR product documentation. However, there may be some vehicles listed that the CDR system is unable to retrieve EDR data from. This may be caused by (but not limited to) information that was not available to Bosch at the time the product was developed or, EDR retrieval may be available only on vehicles with particular options.

Please contact Bosch Technical Support if you are experiencing trouble retrieving EDR data from any of the vehicles listed. The issue will be documented and Bosch will attempt to resolve it in a future release.

### Supported Acura Vehicles

2012		
Make	Model	Module
Acura	MDX (note 1)	ACM
Acura	RL	ACM
Acura	TL	ACM
Acura	TSX	ACM
Acura	ZDX	ACM

2013		
Make	Model	Module
Acura	ILX (includes Hybrid)	ACM
Acura	MDX	ACM
Acura	RDX	ACM
Acura	TL	ACM
Acura	TSX	ACM
Acura	ZDX	ACM

Refer to coverage notes under supported Honda vehicles

### Supported Chrysler Vehicles

2005		
Make	Model	Module
Dodge	Durango (note 2 & 4)	ACM

2006		
Make	Model	Module
Chrysler	300 (note 3 & 5)	ACM
Dodge	Charger (note 3 & 5)	ACM
Dodge	Durango (note 2, & 4)	ACM
Dodge	Magnum (note 3 & 5)	ACM
Dodge	Ram Cab Chassis (note 4)	ACM
Dodge	Ram Pickup (2500, 3500, 4500, 5500) (note 4)	ACM
Dodge	Ram Pickup (1500) (note 4)	ACM
Jeep	Commander (note 3 & 5)	ACM
Jeep	Grand Cherokee (note 3 & 5)	ACM

2007		
Make	Model	Module
Chrysler	300 (note 5)	ACM
Chrysler	Aspen (note 4)	ACM

CDR Supported Vehicle List

<b>2007</b>		
<b>Make</b>	<b>Model</b>	<b>Module</b>
Chrysler	Pacifica (note 5)	ACM
Chrysler	PT Cruiser (note 5, & 7)	ACM
Chrysler	Sebring (note 4)	ACM
Dodge	Caliber (note 4)	ACM
Dodge	Charger (note 5)	ACM
Dodge	Dakota (note 5)	ACM
Dodge	Durango (note 2 & 4)	ACM
Dodge	Magnum (note 5)	ACM
Dodge	Nitro (note 4)	ACM
Dodge	Ram Cab Chassis Medium/Heavy Duty (note 4)	ACM
Dodge	Ram Pickup (2500, 3500, 4500, 5500) (note 4)	ACM
Dodge	Ram Pickup (1500) (note 4)	ACM
Jeep	Commander (note 5)	ACM
Jeep	Compass (note 4)	ACM
Jeep	Grand Cherokee (note 5)	ACM
Jeep	Patriot (note 4)	ACM
Jeep	Wrangler (note 4)	ACM

<b>2008</b>		
<b>Make</b>	<b>Model</b>	<b>Module</b>
Chrysler	300	ACM
Chrysler	Aspen	ACM
Chrysler	Pacifica (note 5)	ACM
Chrysler	PT Cruiser (note 5)	ACM
Chrysler	Sebring	ACM
Chrysler	Town & Country (note 6)	ACM
Dodge	Avenger	ACM
Dodge	Caliber	ACM
Dodge	Caravan (note 6)	ACM
Dodge	Challenger	ACM
Dodge	Charger	ACM
Dodge	Dakota	ACM
Dodge	Durango (note 2)	ACM

<b>2008</b>		
<b>Make</b>	<b>Model</b>	<b>Module</b>
Dodge	Magnum	ACM
Dodge	Nitro	ACM
Dodge	Ram Cab Chassis Medium/Heavy Duty (note 4)	ACM

### Supported Fiat/Lancia Vehicles

<b>2012</b>		
Make	Model	Module
Fiat	500 (North America)	ACM
Fiat	Freemont	ACM
Lancia	Grand Voyager	ACM
Lancia	Flavia (note 11)	ACM
Lancia	Thema	ACM

<b>2013</b>		
Make	Model	Module
Lancia	Flavia (note 11)	ACM
Lancia	Grand Voyager	ACM
Lancia	Thema	ACM
Fiat	500	ACM

<b>2013</b>		
<b>Make</b>	<b>Model</b>	<b>Module</b>
Fiat	Freemont	ACM

The numbers below coincide with the note reference numbers called out in the list of supported Chrysler vehicles.

1. For console mounted shifter, center tunnel before or aft of shifter. For column mounted shifter, center stack.
2. Vehicles equipped with side airbags can be read out by the CDR® tool. Vehicles not equipped with side airbags might be read out by the CDR® tool.
3. For model year 2006, some Chrysler 300, Dodge Magnum, Dodge Charger, Dodge Dakota, Jeep Grand Cherokee, and Jeep Commander models may contain EDR data that can not be read by the CDR® tool.
4. Crash data is recorded for FRONTAL DEPLOYMENTS ONLY on these vehicles.
5. When downloading these modules using the provided CDR® cable, plug the cable into the CDR® Interface Module, apply power and wait at least 1 minute after power is applied before collecting data. Failure to do so may cause an error during download.
6. Retrieval of crash data through the vehicle's DLC connector may not be supported on some early 2008 model year vehicles of this type. For these vehicles, the CDR® application will display an error message after attempting a DLC download and instruct you to connect directly to the ACM module using the specified cable.
7. For model year 2007, some PT Cruisers may contain EDR data that cannot be read by the CDR® tool
8. For model year 2009, Dodge Ram 1500 models have the capability to store pre-crash data for both deployment and non-deployment events.
9. The F00K108453 cable may be required for imaging some 2009 Ram 2500 Trucks.
10. Some early production 2011 Challenger, Durango and Grand Cherokee vehicles may not include Longitudinal & Lateral Delta-V and Angular Rate data.
11. The User Entered VIN must match the VIN stored in the ACM. If it does not match, the CDR tool will retrieve EDR data but only include hexadecimal data in the CDR report.

\*\* for direct to ACM imaging, these vehicles require the F00K10879 ACK Adapter

**Supported Ford Vehicles**

<b>2001</b>		
<b>Make</b>	<b>Model</b>	<b>Module</b>
Ford	Crown Victoria	ACM
Ford	Escape	ACM
Ford	Escort	ACM

The numbers below coincide with the note reference numbers called out in the list of supported Ford vehicles.

1. PCM Note: This vehicle is equipped with a Motorola PCM that can store 32K bytes of data which is 16 times more than other PCMs. Downloads for these PCMs can take up to 8 minutes to complete all 3 passes of the download.
2. PCM Note: This vehicle may be equipped with a Bosch or Motorola (Continental) PCM. The Bosch PCMs are currently not supported by the CDR® tool. You may be able to verify the PCM's manufacturer by looking at its serial/part number label.
3. PCM Note: Heritage F-150 series trucks are not equipped with PCMs that store crash data. Only 2004 F-150 series with the following VIN information are supported:
 

First 3 digits of the VIN are "1FD" or "1Ft" combined with one of the following 5-7 VIN digits: "F02", "F04", "F12", "F14", "W02", "W04", "W12", "W14", "X02", "X04", "X12", "X14"
4. When retrieving EDR data from this ACM through the DLC connector, use the F-00K-108-221 PCM Adapter with the F-00K-108-287 DLC cable to avoid possible spooling of PCM data while the ignition key is on during the download.
5. ACM Note: Downloading data from these ACMs can take up to 3 minutes per pass and 9 minutes for a complete download.
6. PCM Note: This vehicle's PCM may only store 12.5 seconds of crash data.

7. PCM Note: Only gasoline engine PCMs are supported for these vehicles. Diesel engines (8th digit of VIN = P) are not supported.

The numbers below coincide with the note reference numbers called out in the list of supported GM vehicles.

1. Connect directly to the SDM for EV1 electric cars.
2. Does not record pre-crash data.
3. 1999 Saturn vehicle's DLC port has a non-standard wiring configuration and does not interface with the Bosch OBD II interface cable (02002837). Please connect directly to the SDM, or contact Bosch for more information.
4. These trucks have different SDMs depending upon body style. If the eighth digit of the VIN is either F, J, or R, please use the 02002888 cable.
5. For DLC data collection, use the 12 pin DLC cable (P/N: 02003090).
6. A key is not required to download these vehicles, leave ignition off.
7. If the first 3 digits of the VIN are 1GT, 2GT, 3GT, 1GD, 2GD, 3GD, 1GC, 2GC, 3GC, 1GB, 2GB, 3GB and the production sequence number (last 6 digits of the VIN) is 500000 or lower, use 02003003 cable, otherwise, use the 02003320.
8. Only vehicles equipped WITH side curtain airbags have a ROS module. You can tell if a vehicle is equipped with side curtain airbags visually either by noting if they were deployed in a crash or the 'B' pillars are marked with the word "Airbag". Note that the CDR® application will allow you to attempt to retrieve ROS data from vehicles without side curtain airbags even though the ROS module is not installed. In this case, the CDR® application will display a communication error when attempting to retrieve ROS data.
9. Crash data retrieval with the ignition key OFF may not be supported on this vehicle. If you are unable to collect data with the key off, try again with the key ON.
10. For the 2006 Sport Coupe (AP) model vehicles with the RPO ALV (an option package that includes Recaro seats), the system will always report a passenger seat belt buckled status of "buckled."
11. Cadillac STS's with RPO JL7 (StabiliTrak 3.0 option) report steering angle with polarity opposite to SAE j1733 convention.
12. Certain 2000-2002 Cavalier Z24 and Sunfire GT models with a specific engine and transmission combination (both the LD9 - Gas engine, 4 CYL, 2.4L, MFI, DOHC and the MM5 - Manual 5 speed transmission) will report brake switch on/off status backwards.
13. For vehicles equipped with keyless entry systems, switch the ignition to ON with Engine OFF by pressing and holding the Lower start button (it has 2 LED indicators, "O" and "ACC") for 5-6 seconds at which time the upper LED will illuminate.
14. The 02003002 cable and 02003108 Power Booster are no longer available for purchase through Bosch.

### Supported Honda Vehicles

2012		
Make	Model	Module
Honda	CRV	ACM
Honda	Civic	ACM
Honda	Crosstour	ACM
Honda	CR-Z	ACM
Honda	Fit	ACM
Honda	Insight	ACM
Honda	Odyssey (note 1)	ACM
